Challenges to Supply Chain Management

Health & Humanitarian Logistics Conference 2011, Atlanta, GA

Martijn Blansjaar, February 2011

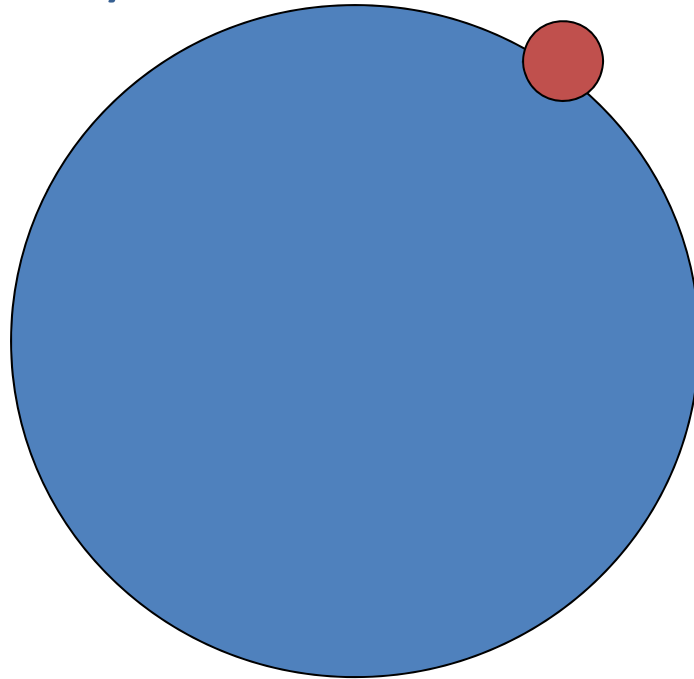

'1 Program'

- Combines Development, Campaigning, Advocacy and Humanitarian Response
- GBP 250 million in 2010
- Reinforce local capacity with emphasis on enabling Government and Communities to lead and take responsibility.

Delivered by 2 Systems

- Local (92%)
- International (8%)

2010 supply: GBP 80 M, 60% Humanitarian

Template - Tailored

- Template:
 - **Standard program components to enable rapid deployment of key emergency services**
- Tailored:
 - **Meeting agreed operational targets for specific scenarios in designated countries.**

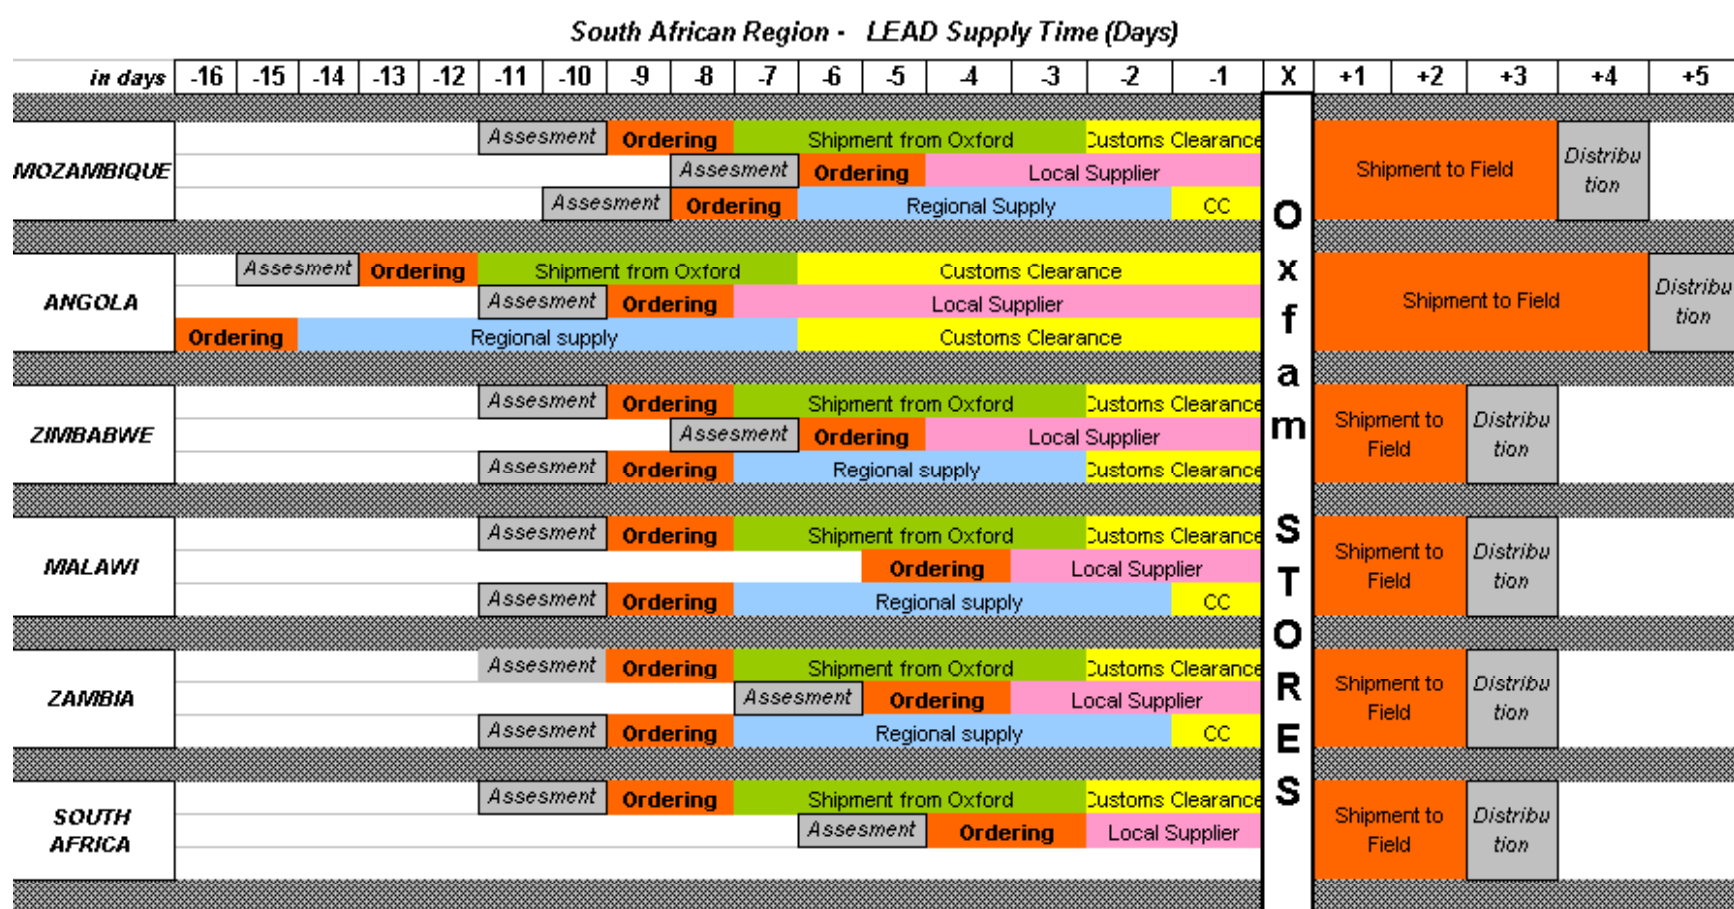

‘Right aid to right people at right place and right time’

	What	Who	Where	When
Template	Global standard	Assessment led	Anywhere	Reactive
Tailored	Local	Community based	Predictable events	Proactive

Key characteristics

	Strong	Weak	Concerns
Template	Apply anywhere	Inefficient, effect?	Innovation
Tailored	Effective	Complex and vulnerable	Management

Emergency supply reviews: blending two systems

Challenges to SCM

- Keeping up with program development
- Switching between modes of operation
- Flexible and responsive service

=>

- Integral planning /project cycle management
- Accurate and up to date information on needs and availability
- Managing delivery across organisations

Thank you
